ParSU e-Feedback

Offices, Routing Categories, Heads & Accounts | Generated 11/8/2026

Login Notes

- All seeded test accounts share the password ParSU_test2026 unless marked Inactive.
- Every one of the 11 seeded offices/colleges has one assigned head/dean plus at least one distinct, non-head office_staff login — so head-only actions (Assign Staff, Change Assignee, Reassign Office) can be exercised against a real staff member in every office, not just tested via the head's own account.
- The Office of the University Registrar (OUR) has two non-head staff logins (staff3@parsu.edu.ph, staff17@parsu.edu.ph) so Change Assignee between two ordinary staff can be tested there specifically.
- OSAS is the one office whose head is not an office_staff account: osasdirector@parsu.edu.ph (OSAS Director, role osas) is Office.headUserRef for OSAS; osas.staff1@parsu.edu, osas.staff2@parsu.edu.ph, and osas.staff3@parsu.edu.ph are OSAS ordinary staff accounts.
- QA is not a separate application role; qa@parsu.edu.ph is an office_staff account assigned to the Quality Assurance Office.
- Verified directly against the live database: 11/11 offices have an active head and at least one active non-head staff login; all 5 colleges have active enrolled students; sample password hashes (admin, dean.ced, staff, student) matched the shared seed password.

Offices, Routing Categories, Heads & Accounts

One row per seeded office/college. "Head / dean" is the user referenced by Office.headUserRef; "Staff / user accounts" lists every active office_staff login in that office.

Implementation Sources Used

- src/app/api/dev/seed/route.ts for seeded offices, users, office head assignments, routing categories, generated students, and the shared seed password.
- src/models/Office.ts and src/models/User.ts for office/head/user field shapes (headUserRef,

officeRef, collegeRef).
- src/features/admin/services/office-head.service.ts for how office heads are validated and assigned.
- src/lib/constants.ts for role names.
- Live database read (Atlas cluster) to confirm every office currently has an active head and staff login, and that seed passwords still validate.
