ParSU e-Feedback

Role Capabilities and Seed Accounts | Generated 11/8/2026

Login Notes

- All seeded test accounts use the password ParSU_test2026.
- The seed route creates 63 users: 28 named base users plus 35 generated active students.
- QA is not a separate application role in the current implementation; qa@parsu.edu.ph is an office_staff account assigned to the Quality Assurance Office.
- Administrator is unrestricted. VPAA, VPAF, and OSAS use the admin area but are data-scoped by backend guards.
- Office Head authority is Office.headUserRef, not a separate software role: every seeded college and university office now has one distinct head account plus at least one ordinary (non-head) office_staff account, so head-only actions (Assign Staff, Change Assignee, Reassign Office) can be tested against a real non-head staff member in every office. The Registrar has two ordinary staff accounts.
- OSAS is the one office whose head is not an office_staff account: osasdirector@parsu.edu.ph (role osas) is Office.headUserRef for OSAS, per BR — VPAA/VPAF/OSAS retain their own software role even while acting as an office head.

Role Summary

Role	Code	Scope	Summary
Student	student	Own student area only	Can submit complaints and feedback; can only see and change their own records.
Office Staff	office_staff	Assigned office	Can work complaints routed to their office and generate office-scoped reports.
Administrator	administrator	All data and routes	Unrestricted system administrator with configuration, account, reporting, and audit access.
VPAA	vpaa	College offices	Scoped sub-admin for college-office complaints, offices, staff users, analytics, and reports.
VPAF	vpaf	University offices	Scoped sub-admin for university-office complaints, offices, staff users, analytics, and reports.
OSAS	osas	Student domain	Scoped sub-admin for student users, all complaint detail read access, student feedback, reports, and OSAS reassignment/ escalation.

What Each Role Can Do

Student

- Access /student pages: dashboard, My Complaints, Submit Complaint, Feedback, notifications, and profile settings.
- Create complaints. The system validates category/ routing/SLA configuration, assigns a ticket number, routes the complaint to an office, and notifies the student and routed office.
- View only their own complaints and complaint timelines.
- Edit title/description or withdraw a complaint only while it is still submitted and before staff action.
- Upload and access attachments only for their own accessible complaints.
- Rate a complaint only after it is resolved, and only once.

- Submit standalone feedback and view their own unarchived feedback.
- Cannot access staff or admin pages; cannot add internal notes, assign complaints, update status, or generate reports.

Office Staff

- Access /staff pages: dashboard, office queue, SLA page, notifications, and profile settings.
- View complaints assigned to their own office only.
- Pick up or assign a complaint to staff in the same office; cannot move complaints to another office.
- Update complaint status within the allowed lifecycle, including progress, pending information, resolved, closed, and reopen paths where valid.
- Add and read internal notes for complaints in their office. Students never see internal notes.
- Generate PDF, Excel, and CSV reports scoped to their own office and see only reports they created.
- Receive and manage own notifications.
- Cannot access admin CRUD/configuration pages; cannot create users, offices, categories, routing rules, SLA rules, settings, audit logs, or announcements.

Administrator

- Can access every route, including student, staff, and admin areas.
- Admin dashboard and analytics are unrestricted across all offices, students, complaints, feedback, and SLA data.
- Manage all users: create, edit, deactivate/reactivate, reset passwords, and force logout.
- Manage all offices, office heads, categories, routing rules, SLA rules, settings, announcements, feedback archive state, audit logs, reports, and complaints.
- View and mutate any complaint where the relevant operation supports mutation: status changes, assignment, reassignment, escalation, notes, attachments, archiving, and reporting.
- Generate reports across all data, subject only to selected report filters.

VPAA

- Uses the admin area but is scoped to college_office data.
- Can view dashboard, complaints, reports, users, offices, notifications, and profile pages within scope.
- Can read full complaint details, notes, and attachments for complaints assigned to college offices.
- Can assign/reassign college-office complaints to active college offices and staff in the target office.
- Can create and manage office_staff users only for college offices.
- Can create/manage offices only in the college_office category.
- Can generate reports constrained to college-office IDs.
- Cannot access administrator-only configuration: categories, routing rules, SLA rules, settings, announcements broadcast, and audit logs.

VPAF

- Uses the admin area but is scoped to university_office data.
- Can view dashboard, complaints, reports, users, offices, notifications, and profile pages within scope.
- Can read full complaint details, notes, and attachments for complaints assigned to university offices.
- Can assign/reassign university-office complaints to active university offices and staff in the target office.
- Can create and manage office_staff users only for university offices.
- Can create/manage offices only in the university_office category.
- Can generate reports constrained to university-office IDs.
- Cannot access administrator-only configuration: categories, routing rules, SLA rules, settings, announcements broadcast, and audit logs.

OSAS

- Uses the admin area with student-domain scope.
- Can view dashboard, complaints, reports, users, feedback, notifications, and profile pages.
- Can manage student accounts only; cannot create staff or administrative users.
- Can read complaint details, notes, and attachments across complaints because OSAS scope is framed around student affairs rather than one office category.
- Can reassign complaints only when they are inside OSAS student-affairs action scope and only to allowed destination offices.
- Can escalate OSAS-scoped complaints only to the configured VPAA/escalation destination.
- Can view standalone student feedback; VPAA and VPAF do not receive feedback access because feedback has no office/college link.
- Cannot access Offices management, administrator-only configuration, announcements broadcast, or audit logs.

Seed Accounts

Use these accounts after running the development seed endpoint. Unless marked inactive, each account can sign in with the shared seed password.

Email	Role	Status	Name	Office / Scope
student@parsu.edu.ph	student	Active	Elliot Anderson	College of Engineering & Computational Sciences
inactive@parsu.edu.ph	student	Inactive	Inactive Test	Login rejection test account
student20001@parsu.edu.ph through student20035@parsu.edu.ph	student	Active	Generated names	7 generated students per seeded college
staff@parsu.edu.ph	office_staff	Active	Maria Santos	Office of the University Registrar (head)
osas.staff1@parsu.edu	office_staff	Active	OSAS Staff 1	Office of Student Affairs and Services
osas.staff2@parsu.edu.ph	office_staff	Active	OSAS Staff 2	Office of Student Affairs and Services
osas.staff3@parsu.edu.ph	office_staff	Active	OSAS Staff 3	Office of Student Affairs and Services
staff3@parsu.edu.ph	office_staff	Active	Enrique Garcia	Office of the University Registrar
vpaa.staff1@parsu.edu.ph	office_staff	Active	VPAA Staff 1	Office of the Vice President for Academic Affairs
vpaa.staff2@parsu.edu.ph	office_staff	Active	VPAA Staff 2	Office of the Vice President for Academic Affairs
vpaa.staff3@parsu.edu.ph	office_staff	Active	VPAA Staff 3	Office of the Vice President for Academic Affairs
vpaf.staff1@parsu.edu.ph	office_staff	Active	VPAF Staff 1	Office of the Vice President for Administration and Finance

Office Staff Routing Accounts

"Head" is the account referenced by Office.headUserRef for that office (only a head can Assign Staff, Change Assignee, or Reassign Office). "Staff" lists the ordinary, non-head office_staff accounts.

Office / head	Routing categories	Staff accounts (non-head)
CECS | Head: Noel Aguilar (staff5@)	Faculty & Non Teaching Performance	staff8@parsu.edu.ph
CED | Head: Andrea Castillo (dean.ced@)	Faculty & Non Teaching Performance - College of Education	staff9@parsu.edu.ph
CBM | Head: Christian Mendoza (dean.cbm@)	Faculty & Non Teaching Performance - College of Business & Management	staff10@parsu.edu.ph
COS | Head: Rosa Navarro (dean.cos@)	Faculty & Non Teaching Performance - College of Science	staff11@parsu.edu.ph
CAH | Head: Katrina Ocampo (dean.cah@)	Faculty & Non Teaching Performance - College of Arts and Humanities	staff12@parsu.edu.ph
OUR | Head: Maria Santos (staff@)	Grade Concern; Document Request Delays; Staff Service & Responsiveness; Administrative Process Concerns	staff3@parsu.edu.ph, staff17@parsu.edu.ph
OSAS | Head: OSAS Director (osasdirector@, role=osas)	Campus Safety & Security; Student Services & Assistance; Health & Medical Services; Scholarships & Financial Assistance	osas.staff1@parsu.edu; osas.staff2@parsu.edu.ph; osas.staff3@parsu.edu.ph
OVPAA | Head: Carlos Mercado (staff6@)	Curriculum & Class Scheduling; Academic Advising & Consultation; Library Services & Resources	staff13@parsu.edu.ph
OVPAF | Head: Bea Salonga (staff7@)	Student Payment & Cashier Concerns	staff14@parsu.edu.ph
GSO | Head: Liza Domingo (staff4@)	Classroom & Laboratory Facilities; Restroom & Sanitation; Campus Wi-Fi & IT Infrastructure	staff16@parsu.edu.ph
QAO | Head: Elena Reyes (qa@)	No direct routing category; quality-assurance staff account	staff15@parsu.edu.ph

Implementation Sources Used

- src/lib/constants.ts for role names and status constants.
- src/middleware/rbac.ts for route-level access.
- src/lib/api-guards.ts and src/lib/admin-scope.ts for administrator and scoped sub-admin behavior.
- src/app/api/complaints/** for complaint creation, reading, status changes, ratings, notes, and assignment scopes.
- src/app/api/admin/** for user, office, category, settings, audit-log, and announcement guard behavior.

- src/app/api/reports/export/route.ts for report generation permissions and data scoping.
- src/app/api/dev/seed/route.ts for seeded account emails, names, offices, status, generated students, and shared seed password.
